FLASH! The Radius toothbrush is not only wonderful for homo sapiens but also excellent for dogs.

A patient reported to me that she loves the new Radius toothbrush; she's been using one of the Radius brushes on her chocolate lab. She said her dog's gums always bled no matter what she did but by using the Radius toothbrush, the bleeding has stopped completely.

Again, another reason why effective toothbrushing with a Radius toothbrush is good for all, even our canine friends.

Yours truly,
Victor M. Sternberg, D.M.D.
